PROFILE

ASIR + DAW graduate focused on Linux systems, networking and DevOps, with internship experience and a homelab supporting services in daily use. Manage infrastructure with Terraform and Ansible, and build deployment workflows with Kubernetes and GitOps. I look for the causes behind recurring problems and turn manual fixes into maintainable automation. Experienced working with clients and technical teams in English.

TECHNICAL SKILLS

Infrastructure & IaC	Terraform, Ansible, Ansible Vault, Proxmox VE, LXC, ZFS
Containers & delivery	Docker, Kubernetes / K3s, Argo CD, GitLab CI/CD, Git
Linux & networking	Debian, Alpine, Arch Linux, MikroTik, VLANs, WireGuard, Traefik, Technitium DNS
Observability & security	Zabbix, Wazuh, Prometheus, Grafana, Loki, SSH hardening
Development & data	Python, JavaScript / TypeScript, NestJS, Next.js, PHP, PostgreSQL, MariaDB, Keycloak

WORK EXPERIENCE

Software Development Technician · Internship

Centro Universitario Cardenal Cisneros · Alcalá de Henares, Spain
September 2025 – June 2026

- Developed and maintained internal software and utilities for university staff.
- Redesigned relational databases to improve organisation, data access and automated workflows.
- Migrated the centre's website and application ecosystem to a newer version, modernising the codebase and user interface.
- Built Python scripts to classify and assign student documents automatically through Paperless-ngx.
- Researched AI and handwriting recognition to support automated responses to student enquiries.

IT Technician · International internship

Micro Technology Consultancy Ltd · Ғаž-Ғеbbuғ, Malta
April – June 2023

- Worked entirely in English, coordinating the local technical team on client projects and providing on-site support.
- Led implementation of dual-tablet charging splitters and client-required software for a fleet of **250 taxis**.
- Contributed to the deployment of **700 IP phones** for a hotel, including PBX software configuration.

SELECTED PROJECTS

Homelab · Infrastructure as Code & Operations

Ongoing personal project · Proxmox VE, Terraform, Ansible, Linux

- Migrated self-hosted services to infrastructure as code: Terraform provisions Proxmox resources; reusable Ansible roles configure applications and operating systems.
- Maintain version-controlled infrastructure, encrypted secrets with Ansible Vault, and service migrations with attention to persistent data and configuration drift.
- Administer virtual machines and LXC containers, ZFS storage and NVIDIA GPU passthrough for hardware-accelerated workloads.
- Manage MikroTik networking, VLAN segmentation, WireGuard remote access, Traefik reverse proxying and Technitium DNS.
- Automate Zabbix and Wazuh agent deployment; maintain monitoring, investigate vulnerabilities and apply reusable Linux hardening configurations.
- Develop and operate **ia-asistente**, a local AI assistant using Python, Ollama and Qdrant to improve visibility into server health through natural-language queries about containers, resource usage, storage and backups.
- Combine monitoring snapshots with retrieval from Obsidian documentation to contextualise operational issues; maintain evaluation scripts for retrieval and tool responses.

XPIFY · E-learning Gamification Platform

ASIR + DAW final project · Deployed to production · **Grade: 10/10**

- Owned backend development, infrastructure and deployment automation, and contributed to the Next.js frontend.
- Built a NestJS REST API with PostgreSQL, Keycloak authentication and role-based access, plus real-time chat and game events using Socket.io.
- Deployed on Kubernetes (K3s) with Argo CD GitOps and GitLab CI/CD; integrated Prometheus, Grafana and Loki for metrics and logs.

EDUCATION

Higher Vocational Qualifications · ASIR + DAW

Computer Network Systems Administration & Web Application Development

GSD International School Buitrago · September 2023 – June 2026

Combined programme covering systems administration, networking, databases and web development, with a final work-placement year.

Vocational Qualification · Microcomputer Systems & Networks

GSD International School Buitrago · September 2021 – June 2023

LANGUAGES

Spanish: native · **English:** C1 listening / reading; B2 speaking / writing

Practical experience working in English during an international IT internship.

INTERESTS

Self-hosting and automation · Padel · Hiking · Board games and escape rooms
